Full-Stack Engineer with around **2 years** shipping production features across large-scale ERP systems and real-time distributed platforms. Strong in **React.js, TypeScript, Java, Spring Boot, and Node.js** — with a track record of cutting API latency by **20–30%**, scaling search across **100K+ records** to sub-second response, and improving system throughput by **~25%**. Currently building **AI-powered productivity tools** with **OpenAI GPT, RAG, and LLM integration**.

SKILLS

Languages	Java, TypeScript, JavaScript (ES2022+), SQL, HTML5, CSS3
Frontend	React.js, Next.js, Angular, Vue.js, Tailwind, TanStack Query, React Hook Form, Jest
Backend & AI	Spring Boot, Node.js, REST, GraphQL, WebSockets, JMS, Microservices, OpenAI GPT, RAG Pipelines
Data & Cloud	MongoDB, MySQL, PostgreSQL, Redis, Elasticsearch, AWS, Git/CI-CD, System Design

TECHNICAL EXPERIENCE

Software Developer

RW Team

Sep 2025 — Present

Bangalore, India

- Owned end-to-end delivery of the **Returns Module** on a large-scale ERP serving hundreds of daily users; designed **20+ REST APIs** in Java/Spring Boot, cutting API latency by **20–30%** via query tuning, payload optimization, and connection-pool tuning.
- Architected **asynchronous JMS-based pipelines** for long-running ERP workflows, raising system throughput and reducing peak load on core services by **~25%**.
- Built **Elasticsearch search and analytics** delivering **sub-second queries over 100K+ records** via custom analyzers, denormalized indices, and tuned aggregations; shipped full-stack features across Vue.js and Spring Boot.

Software Developer

California Software

Jun 2024 — Aug 2025

Chennai, Tamil Nadu

- Engineered reusable, responsive UI systems in **React.js, Angular, TypeScript**; drove **up to 40% performance gains** through memoization, code splitting, and rendering-path optimization.
- Architected a **real-time messaging system in WebSockets + Node.js** with **sub-second (<1s) message delivery** across concurrent sessions, designed for horizontal scaling via clean pub/sub fan-out.
- Delivered **Spring Boot microservices** with contract-first REST APIs, circuit-breakers, and graceful degradation; led modernization of legacy monolith modules, cutting tech debt and accelerating team velocity.

PROJECTS

ERP Insights — Search & Analytics Platform

[Live Demo](#) | [GitHub](#)

Java | Spring Boot | React.js | Elasticsearch | JMS

- Engineered an **Elasticsearch-powered search module** over 100K+ ERP records with optimized mappings and aggregation pipelines, achieving **sub-second filtered queries** across multi-field datasets.
- Built **JMS-driven async indexing pipelines** decoupling writes from search availability, paired with dynamic React dashboards for self-serve analytics — eliminating manual exports.

LifeOS AI — Intelligent Productivity Suite

[Live Demo](#) | [GitHub](#)

Next.js | React.js | Java | Spring Boot | Node.js | OpenAI GPT | MongoDB

- Architected an **AI-first productivity platform** embedding GPT into habit tracking, task planning, and meeting summarization; built a **GPT-powered meeting summarizer** that converts transcripts into structured action items, decisions, and follow-ups.
- Designed a **real-time SSE streaming architecture** in Next.js for token-by-token AI rendering, backed by Spring Boot microservices, Node.js APIs, and MongoDB — eliminating polling overhead.

Nebula Stream — Real-Time Messaging Platform

[Live Demo](#) | [GitHub](#)

Node.js | WebSockets | Redis | Event-Driven Architecture

- Architected a scalable real-time chat system with **instant messaging, presence tracking, and group channels**; leveraged **Redis pub/sub** for horizontal scaling of WebSocket fan-out and guaranteed delivery with graceful reconnection.

EDUCATION

Bachelor of Technology in Information Technology, KGISL Institute of Technology

Coimbatore, Tamil Nadu

2020 – 2024

CGPA: 8.37
