

Full-Stack Developer with over **1.7 years** of experience building scalable, high-performance applications using **React, Angular, Vue, Node.js, Java, and Spring Boot**. Strong in **UI development, API integration, performance optimization**, and applying **clean architecture**. Experienced in implementing **real-time dashboards, e-commerce modules**, and contributing to **microservice-based enterprise systems**. **Actively learning AI/ML** through hands-on projects using **OpenAI GPT APIs, LangChain, and RAG pipelines** for intelligent recruitment and analytics solutions.

SKILLS

Front-End Development	React.js, Angular, Vue.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Jest
Back-End Development	Java, Spring Boot, Node.js, GraphQL, REST APIs, WebSocket, JMS/Message Queues
AI & Machine Learning [Learning Stage]	Python (FastAPI), TensorFlow, PyTorch, LangChain, LlamaIndex, Hugging Face Transformers, RAG Pipelines, OpenAI GPT APIs, Vector Databases (Pinecone), Model Fine-tuning, MLOps (MLflow)
Tools & Databases	Git, GitHub, MySQL, MongoDB, AWS, Elasticsearch
Frameworks & Principles	MVC, OOPS, SOLID, Design Patterns, Microservice Architecture
Soft Skills	Problem-Solving, Analytical Thinking, Collaboration, Communication

TECHNICAL EXPERIENCE

Software Developer

RW Team

Sep 2025 — Present

Bangalore, Karnataka

- Contributing to a large-scale **ERP platform**, building and maintaining multiple backend modules using **Java, Spring Boot, Vue.js, and Elasticsearch**.
- Developed and optimized **20+ REST APIs** for core ERP workflows, improving data flow efficiency and module integration.
- Single-handedly designed and implemented the **Returns Module backend**, handling complex business logic, data validations, and workflow automation.
- Used **JMS/Message Queues** to process high-volume tasks asynchronously, significantly improving system performance and reducing load on core services.
- Implemented advanced **Elasticsearch queries** for fast and scalable data indexing, search, and analytics across ERP components.
- Collaborated closely with cross-functional teams to ensure smooth feature delivery, performance tuning, and production deployment.

Software Developer

California Software

Jun 2024 — Aug 2025

Chennai, TamilNadu

- Built dynamic and responsive UI components using **React.js** and **Angular**, improving overall user interaction and page responsiveness.
- Developed and integrated scalable backend APIs using **Java Spring Boot**, ensuring efficient communication across modules.
- Designed and implemented **microservice-based modules** to enhance scalability, maintainability, and deployment flexibility.
- Applied the **Singleton design pattern** in backend services to optimize resource usage and ensure consistent service behavior.
- Engineered a real-time **Bulk Messaging System** using **WebSocket** and **Node.js**, enabling high-speed message broadcasting.
- Modernized legacy modules by migrating them to updated tech stacks, resulting in improved reliability and reduced technical debt.
- Developed an interactive **Product Customizer** using **fabric.js** with drag-and-drop functionality for a seamless user experience.
- Achieved up to **40% improvement in load time** through performance optimization and code refactoring.

EDUCATION

Bachelor of Technology in Information Technology, KGISL Institute of Technology

Coimbatore, Tamil Nadu

2020 – 2024

CGPA: 8.37

PROJECTS

- ERP Search & Analytics Module** – Engineered a high-performance search and analytics module using **Java, Spring Boot, Vue.js, and Elasticsearch**. Built fast indexing, filtered queries, and JMS-based asynchronous processing for ERP workflows. [GitHub](#)
- Enterprise ERP & Analytics Core** – Developed high-performance backend modules for large-scale ERP platform. Implemented complex business logic, data validations, real-time analytics dashboards, and scalable microservices. [GitHub](#)
- Nebula Stream** – Built real-time communication infrastructure with sub-second latency messaging. Features include instant messaging, live user status, group channels, and Redis-powered session management. [GitHub](#)
- TalentLens AI (Learning)** – Next-gen recruitment platform using LLMs for resume parsing and candidate ranking. Implemented OpenAI GPT APIs, automated screening workflows, bias detection, and FastAPI backend services. [GitHub](#)
